

Dr. Martin Shank-President

Born and raised in NYC, I received my graduate degree in biological science from Brooklyn College, City University of New York. I earned my medical degree in Chicago, and moved to Florida in 1978 with my wife. I've lived in Coral Springs since 1979 and raised my family, living in the Coral Springs Improvement District (CSID) since 1980. My children have attended local schools, all of them graduating from J.P. Taravella High School and the University of Florida.

I have practiced foot surgery in the West Boca area since I arrived in Florida. As my wife and I have become empty nesters, I thought it was important to get involved with my community and I could not think of a better place to start than the Board of Supervisors of the CSID. I look forward to making the CSID the best utility, not only in the City, but in the State. We are starting a new era with the soon-to-be-completed wastewater treatment and state of the art nano-filtration water processing plants. The CSID is owned by the landowners and run for the residents of the district. The board and the employees shall strive to continue providing you with the best service possible. We value your input and invite you to attend the monthly Board of Supervisors meetings and workshops.

Duane L. Holland - Vice President

As a native of the suburbs of Philadelphia, Pennsylvania, educated at Villanova University with a Bachelors degree in Economics and graduate work in Business at Temple University, I have spent over 35 years of my professional career in leadership roles domestically and internationally in Fortune 500 corporations such as Merck, DuPont and Bayer. The first half of my career was devoted to manufacturing, strategic planning and operations while the remainder of my career, I was leading initiatives in Human Resources, focused on Organizational Development, Equal Employment, and Mergers and Acquisitions. This portion of my career was enjoyable and extremely rewarding because it afforded me the opportunity to become actively involved in external interface with local, state, and federal public/government programs. Serving in key roles as Chairman of the Montgomery County Private Industry Council Board member of the Philadelphia Economic Development Coalition, Philadelphia First Corporation and many other community-based organizations.

The city of Coral Springs has been an area my wife, Raquel, and I had long sought out as a great place to settle for a number of years. Not only because Coral Springs was chosen as a Malcolm Baldrige award winning city but also because my two younger brothers have lived here, raising and educating their children in this highly rated school district. Additionally, as an avid golfer, I had visited this area quite often to play golf with family, friends and in tournaments. Coral Springs is a clean city, conveniently located and family friendly. We have been here for over two years. We are happy here and we love it!

I am extremely honored to be elected to serve as a member of the Board of Supervisors, for CSID. My primary objectives, as I serve in this capacity, will be to continuously work to ensure that the most effective quality, service and technology be delivered to our residents as a fair and reasonable rate.

Nick St. Cavish Secretary

My wife and I have been residents of the District since 1980, and have raised our two children here. Both graduated from Taravella High School. I was born and raised in Louisville, KY and lived there until my college years at Ohio State University, where I obtained a BS of Electrical Engineering. Several years later while working outside Chicago, I got an MS of Computer Science from Northwestern University.

I am now retired. I spent the majority of my career in the telecommunications field as a computer programmer working for AT&T Bell Labs and Siemens AG. When my children were growing up, I volunteered as an assistant coach on soccer and Little League teams. I was also active in the Taravella Band Parents organization. I also volunteered at the Coral Springs Police Department in their CSI lab. In addition, I designed and maintain several websites, including one for the Coral Springs Orchid Society.

My family was drawn to Coral Springs because of its attractive lifestyle, high-quality schools and reputation as a great place to raise a family. I very much look forward to serving on the CSID board, and continuing its policy of providing our residents the highest quality water and services, using innovative, state-of-the art techniques.
